Student Defer Attendance Renamed to Manage Initial Program and Session Dates

The student Defer Attendance action will be renamed to Manage Initial Program and Session Dates. After the school official enters the program start and end dates, the system will display "The length of this program is <length calculated in months> months." If the Initial Session Start Date does not meet the updated rules, the following error message will be displayed to the school official, "The Initial Session Start Date may not be more than 152 days after the earliest of the student's Program End Date (if not on post-completion OPT), or the Actual Program End Date, or the Transfer Release date."

Addition of the Length of Next Break/Vacation Indicator

For this release a Length of Next Break/Vacation indicator will be provided to school officials. This date will calculate the period between the student's Current Session End Date (CSED) and the Next Session Start Date (NSSD) to determine if the period between sessions is for an extended period of time. This new field, Length of Next Break/Vacation, can be located on the Student Information screen under Registration.

Mass Student Registration

This release will provide the ability for school officials to perform a mass update for student registration to allow school officials to comply with regulatory reporting requirements. From the Listing of Schools screen, the school official will have to click the Mass Actions button and select the Registration link from the SEVIS Mass Actions screen. On the Mass Action: Registration – Records Search screen, school officials will be provided the ability to search for student records eligible for registration. The school official will be able to select from the class of admission, level of study, session start date to/from, and program end date to/from to further refine their list of students for registration. The school official will also have the ability to refine the search by surname/primary name first letter range and CIP code. The school official may also choose to sort the results by Surname/Primary Name, Given Name, Education Level, Major 1, Major 2, Program End Date, and Session Start Date, in either ascending or descending order.

For a student to be included in a mass registration the student cannot owe payment for the I-901 fee. All students must have a U.S. address (with the exception of Border Commuters). Continuing students must also have an e-mail address and telephone information unless the student is a K-12 F-1 student or an M-1 student under the age of 14. Students who do not meet these criteria will not be included in the search results for mass registration.

Example of the Mass Action: Registration – Records Search Screen

The list of student records which match the selected criteria will be displayed on the Mass Action: Registration – Selected Records screen. The columns displayed will be SEVIS ID, Surname/Primary Name, Given Name, Status, Major 1, Major 2, Education Level, Program End Date, and Session Start Date. The school official will also be able to select one particular student record or multiple student records for registration. As the school official navigates through the multiple pages of the result set, records selected on previous pages will remain selected. From this search results page the school official also has the ability to click on the student’s Surname/Primary Name to view the student record in another window without affecting the list of student records already selected for registration.
